

INTERMOUNTAIN POWER SERVICE CORPORATION  
**AUTHORIZATION TO REMOVE CRITICAL EQUIPMENT FROM SERVICE**

Requestor: Kevin Miller Date: 2/8/05 WO# 02-53663-18

Unit: 1 Equipment: ID Fans 1C & 1D

What needs to be done to the above listed equipment?

Remove 1C fan from service on 2/12/05 for one shift and remove 1D fan from service on 2/13/05 for one shift to install motor shaft encoders preparatory to the drive replacements during the Unit 1 outage.

Why are you recommending that the work be performed now, rather than waiting for an outage window?

This Unit will be online but we will have Alstom technical directors here working during this Unit 2 outage window on the Unit 2 ID Fan 1D drive retrofits. We require their expertise to properly setup the encoders while we have the ability to run the fans. During the Unit 1 outage fans will not be runnable.

Desired Start Date: 2/12/05 Time: 0700

Expected Completion Date: 2/13/05 Time: 1530

Expected Load Reduction Associated with this request:

0 MW
